Dear Hiring Team at Invertase,

I'm excited to apply for the **Developer Advocate - Dart & Flutter Products** position. As someone who has been working with **Flutter** and **Dart** to build real-world applications, I'm passionate about helping developers overcome challenges and creating tools that make their work easier and more enjoyable.

Over the years, I've worked on projects that combine technical problem-solving with community-focused initiatives. For example:

- I've developed apps using **Flutter** and **Dart**, like a recipe generation app that integrates APIs, showcasing my ability to build practical, user-focused solutions.
- I've created REST APIs using **FastAPI** and **Flask**, focusing on clean design, security, and scalability, which has helped me better understand how developers interact with backend services.
- I've also worked on automation projects using tools like **Node-RED**, integrating industrial protocols such as Modbus and MQTT.

Beyond coding, I enjoy sharing knowledge. Whether it's through GitHub projects, technical guides, or just helping others in online communities, I believe in fostering collaboration and learning together. I see this role as a great opportunity to continue doing that on a larger scale while contributing to the growth of the Flutter and Dart ecosystem.

I'm impressed by the tools Invertase has developed, like **Melos** and **Zapp.run**, and I'd love to help make them even more accessible and useful for developers worldwide. With my mix of technical skills and a genuine passion for community building, I'm confident I can bring value to your team.

Thank you for considering my application. I'd love the chance to discuss how I can contribute to Invertase's mission.

Best regards,
Daniel Girotto Rosseto
